Nylon Choker Anchorage Connector

This anchorage connector can be used to fasten around an I-beam or similar structure to provide compatible anchorage for attaching a fall-arrest connecting device.

This connecting device must only be fastened to structures (or other anchorages) that are capable of supporting 5,000 lbs.

Unique half-twist design allows the 2" (51 mm) wide nylon webbing to remain flat and in continuous contact with the structural member. This feature reduces wear and stress on the webbing.

Durable forged circle D-ring has corrosion-resistant finish, wear-minimizing roller, and is 100% proof-loaded to meet OSHA regulations.

NOTE: This is NOT an occupational protective belt for personal use.

Always follow the A-B-C rule when using.
